The Missouri MINER

UNIVERSITY OF MISSOURI AT ROLLA

Welcome
Parents

VOLUME 52

FRIDAY, OCTOBER 29, 1965, ROLLA, MISSOURI

NUMBER 7

MSM to Have New Private Residence Hall

Variety of Activities Featured on Parents' Day

Parents of over 4,000 MSM students have been invited to visit the campus for "Parents' Day," Oct. 30. Campus tours, reception by administrators and faculty and a Rolla "Miner" football game honoring fathers of the team have been scheduled.

The Hon. J. F. Patterson, Missouri state senator from the 25th Congressional District, will speak to MSM parents at the Annual Parents' Day Banquet to be held at 6 p.m., Oct. 30, at the Rolla High School Cafeteria. Performing at the banquet will be a vocal group of five "Miners" from Kappa Alpha social fraternity.

"Parent's Day" registration is from 8 a.m. to 12:30 p.m. at the Student Union, and parents are invited to meet Chancellor Merl Baker at his reception from 10 to

11:30 a.m. Buildings and laboratories will be open for inspection by visiting guests, and students will conduct guided tours of University facilities.

The Rolla Miner football team meets the Springfield Bears at Jackling Field on "Parents' Day," in the game honoring player's "Dads." Game kick-off time is 2 p.m. The University Student Union Board, represented on the faculty committee on Public occasions by "Miner" Howard Stine, Springfield, will be in charge of special recognition to Miner football fathers.

Events will be directed by the public occasions committee led by Prof. G. G. Skitek in cooperation with the faculty athletic committee whose chairman is Prof. Rodney A. Schaefer.

The foundation has been set and the walls are going up on what will be known at MSM as the Thomas Jefferson Residence Hall, 200 W. 18th St. The 7-story

representative at the site any time after Nov. 15, 1965.

The first private housing project on the University campus, Thomas Jefferson Residence Hall

ing room on the first floor of Thomas Jefferson Residence Hall will have two cafeteria lines with a wide variety of food at each meal, including two meat entrees.

Architect's conception of new Thomas Jefferson Residence Hall. The structure should be completed by the beginning of the 1966-67 school year. The seven story structure will house 530 students.

building will be completed in time for student occupancy before next fall semester. Reservations can be made through the manager's

is owned by Rolla Associates and will house 530 students.

For \$525 per semester, students may live in air-conditioned, two-man rooms and eat 20 meals a week. They may walk through carpeted corridors and sleep in over-size beds with box springs.

The out-door swimming pool at Thomas Jefferson will be surrounded by a 30' by 60' terrace, with access to the main floor lounge.

A model room will be open on the site of Thomas Jefferson Residence Hall, Nov. 15. Curious "Miners" can see the furnished room, with built-in bookcases and individual 4½-ft. closets.

For each floor of the Hall, the architect, Eugene Wasserman, Sheboygan, Wisconsin, has designed two lounges . . . a study lounge and floor lounge . . . each opening onto a balcony. For the personnel assistants, a private suite will be available. Two "community" bathrooms are located on each floor.

According to Bernard B. Heilprin, executive vice-president for the managing firm, University Dormitory Development, Inc., his company is recognized in the field for good cafeteria food. The din-

During the winter, when the swimming pool is frozen, Hall activities are likely to be centered in the basement, with its snack bar and rumpus room. "Miners" will have facilities for billiards and ping pong, and an exercise room, hobby room, typing-seminar room and complete coin-operated laundry facility.

An adjacent parking lot will provide space for 100 cars. Thomas Jefferson Residence Hall, built by J. E. Hathman, Contractors, Columbia, will be open after 1966 for summer school students and conference and seminar participants.

According to Chancellor Merl Baker, "The Thomas Jefferson Residence Hall is a valuable addition to the new facilities of MSM. It is in keeping with the needs of MSM students and will provide urgently needed housing."

"Since the University of Missouri at Rolla is a specialized University in the fields of engineering and science, the name chosen for this new facility is in keeping with this special objectives because Thomas Jefferson was not only an educator, but he made many contributions to engineering, science, and to architecture."

Student-Faculty Relationships Increased by New Committees

Faculty-student relationships will receive a big boost this year when members of the student body take their places on various faculty committees. Student representation on these committees numbers 42, 34 of which are Student Council representatives. Both sides of academic life feel that this will be an asset to the university. The faculty believes that direct student representation on these committees will bring about a better understanding of faculty action on the part of the students. The Student Council feels that this arrangement will give the students a better insight into faculty action. It also enables them to present the student view point on important mat-

ters when it may do the most good.

Students were selected from a list given to the Chancellor's office by the president of the Student Council. The students who were appointed and the committees to which they were appointed are listed below.

Athletics: R. Aubrect, A. Congiario.

Public Occasions: R. Jackson, M. Klosterman, H. Stine.

ASEE Goals of Eng. Ed.: R. Williams.

Campus Facility Planning: A. Ponnwitz.

Subcommittee-Auditorium: R. Winn.

Subcommittee-Student Union Building: M. Deelo, B. Graham, R. Winn, F. Woodbury.

College Liaison: W. Guelbert, J. Peterson.

Effective Teaching Seminar: D. Kissel.

General Lectures: B. Schweigert.

High School Liaison: M. Hardy, S. Mueller, F. Woodbury.

Housing: J. Chase, G. Graham, M. Hardy, M. Thieme.

Residence Halls, Women: Gail Davidge.

(Continued on Page 6)

Seismometer Indicates Earthquake Near Rolla

Readings from seismometers operated by the MSM Geophysical Observatory indicate that the initial disturbance of last week's earthquake occurred near Rolla, according to Dr. Hughes Zenor, director of the Observatory.

Seismometer records show that at 8:04 and 53.5 seconds p.m., October 20, the first shock was felt and recorded. From the high frequency of the disturbance and the visual observation of the motions, it appears that the earthquake was some place in the Ozark region and possibly near Rolla, Dr. Zenor said.

Whether the earthquake was under Rolla or as much as 200

miles away can not be known for sure until calculations are made based on the recordings of several stations. The calculations were being made by St. Louis University which operates a network of stations. MSM is furnishing data to assist in these calculations.

Plans have been initiated for the construction of a network of stations to be operated by the Geophysical Observatory. They will record the information on magnetic tape and telemeter it on call to the campus lab for computer analysis. Dr. Zenor has just returned from a ten-day trip to New York, Washington and Albuquerque to make preliminary

arrangements for this network. It will fit in the international network operated by the Coast and Geodetic Survey under the direction of Leonard Murphy, chief of the seismology division.

The MSM Geophysical Observatory is preparing instrumentation for visual recordings so that the information will be available immediately. It will not be necessary to wait for the development of photographic records as is now required. Dr. Zenor pointed out that this will be a tremendous improvement. The present instrumentation was designed for scientific studies of the earth which are often made days, months or

many years after the occurrence of the disturbance.

The instrumentation now being used at the Observatory is extremely sensitive and records earthquakes occurring all over the world. They are so sensitive that the local disturbance threw the instruments completely off scale, making it impossible to study the wave motion. It is planned to install additional instruments called strong motion seismometers that will record the large amplitudes occurring for local disturbances.

Some of the earlier seismic records were made by a stylus on smoked paper, which had the ad-

vantage of immediate availability of the records. The more recent development of photographic techniques provide much better records and has been used almost universally because of the increased information available. However, the photographic records do not give immediate information.

Dr. Zenor explained that the present method of immediate location of earthquakes is to call by long distance telephone, the mayors of all the cities in the disturbed region. Often the city of the one who appears to be most excited is reported as the center of the disturbance, he said.

MSM Plans Engineer's Day Welcome Prospective Students

"Engineer's Day" will be Saturday, Nov. 6, at MSM. Faculty and students at the engineering and science institution have delegated this special day to welcome prospective students to the campus.

High school and junior college students with an interest in academic careers in one of 22 specialized fields offered at the University will receive counseling and tour facilities during "Engineer's Day."

Beginning at 8 a.m., Nov. 6, the Student Union will be open for "Engineer's Day" registration. Parents, teachers and counselors of visiting students are also invited to see MSM, the largest engineering school west of the Mississippi River.

From 8 a.m. to 3 p.m., Saturday, Nov. 6, at MSM. Faculty

will be open for inspection. Campus tours will be available and members of the Rolla student body, faculty and administration will be on hand to explain curricula and student activities. Special displays in all departments will demonstrate the fields of study offered at Rolla.

The University of Missouri at Rolla offers degrees in 22 specialized areas: ceramic, chemical, civil, mining, electrical, geological, geophysical, mechanical, metallurgical, nuclear and petroleum engineering; chemistry, computer science, energy conversion, engineering mechanics, engineering physics, engineering administration, physics, propulsion and space engineering, mathematics, geophysics and geology.

New Faculty Proposals Discussed At Chancellor's Third Coffee Chat

In the third coffee chat of the year such topics as new proposals before the faculty, honor among the students, graduation requirements, and changing the schools program to a five year set up were

discussed by Chancellor Baker, accompanied by Dr. Thompson and Prof. Remington talk with students at third coffee chat.

Chancellor Baker, accompanied by Dr. Thompson and Prof. Remington talk with students at third coffee chat.

discussed by Chancellor Baker, Dr. Thompson, and Professor Remington.

Raising the scholastic probation level to a 2 point is now being discussed. For first semester freshmen it would be a 1.75. Also before the faculty is the six week drop rule. This would cut down on the drops and encourage students to take less hours and get better grades.

Honor among students was brought up with the seeming rise in cribbing. It is now a give and take situation. Some teachers give harder tests with the average often below 20%. It was suggested that this matter be taken to the student council.

Our graduation requirements are 140 to 150 hours for a degree that can be earned at some other school for 124. This causes the students to take 17 to 19 hours per semester and puts a 15 to 20% overload on each student. At UMR it takes an average of 4.7 years to earn a 4 year degree. Many think the semester load should be lightened and the school

ses must have a C average or better. This is already used in some of the departments and may be widened to include the entire school.

November 10 is the date for the next scheduled coffee chat.

UMKC Music Conservatory Presents Heritage Singers for MSM Enjoyment

Another in the series of lectures and concerts by the Student Union Board was presented last Tuesday evening as the University of Missouri at Kansas City Heritage Singers presented their repertoire of modern arrangements and folk ballads, to an audience of Miners including many faculty members and their

Singers is W. Everett Hendricks who gave a brief sketch about the origin and significance of each selection performed by the group. The group includes 42 vocalists (21 male, 21 female, most of whom are Missouri University students), Choral Associates Edward Deckard and Gene Kelsay, Tour Manager John Mizell, and

and "These Are a Few of My Favorite Things," typical of that outstanding Broadway musical.

The student body welcomes such groups of college entertainers, especially fellow students in the University of Missouri system. The Student Union Board expressed their appreciation to the Heritage Singers for the opportunity to meet other groups of Missouri University students on such occasions and encourages similar activities in the future.

Forty-two voices strong . . . the University of Kansas City Heritage Singers perform in their last concert series of the season.

wives. The performance was the last in a series of concerts in the fall tour of the Heritage Singers, who perform at numerous mid-western college campuses.

The Heritage Singers are sponsored by the musical department Conservatory of the University of Missouri at Kansas City. Most of the singers in this group are majoring in music or students enrolled in other curriculums with special interest and talent in music. This group differs from the glee club or other choral groups in that major emphasis is placed upon selections and ballads which are rich in folklore and heritage. In addition to the Heritage Singers, the UMKC Conservatory sponsors several other well-known groups notably the University Choir, the University Symphony Orchestra, the Concert Wing Ensemble, and the Madrigal Singers, a group which we hope will be scheduled for the Student Union Concert Series in the near future.

The conductor of the Heritage

Conductor Hendricks.

Following a brief introduction, Conductor Hendricks led the vocalists in "O Clap Your Hands" by Rohlig. This was followed by a beautiful arrangement of Tschernokoff's "Salvation is Created," Cassler's "The Godly Stranger," and climactically, "Laude Him," by Pepping, all of religious nature. The singers then took a short intermission, followed by several selections of hearty Rhineland tempo by the male vocalists only. "Gutten Nacht," an ancient German lullaby, translated as meaning "good night, little one" was one such selection performed by the male vocalists. The female singers then returned to the stage proper for several scores from "The Sound of Music," which served as the grand finale. Those in attendance enjoyed immensely the familiar tunes "Climb Every Mountain"

UPTOWN THEATRE MOVIES IN CINEMASCOPE

Starts Friday Oct. 29-Nov. 2

General Power Speaks on America's Defense Deterrent for the Nuclear Age

General Thomas Power, a United States JSTPS Military Planning Executive, presented an entertaining and informative lecture entitled "Survival Fitness in the Nuclear Age," on October 21, in the Student Union Ballroom. This was one of a series of lectures provided by the Student Union Board throughout the school year designed to keep a technically-minded student body abreast in the fields of current events. This is necessary for the well-rounded education of the modern engineer.

As an experienced war planner for many years, General Power related many of his experiences and ideas designed to "Keep America Strong." He began by generally outlining our defense structure and gave his audience a sketch of his responsibilities and duties as a war planner. He also spoke of the reason for stockpiling weapons and explained that there is no such thing as a minimum deterrent in today's world of the megaton nuclear payload. He stated that there is such an ever-changing array of nuclear capability behind the Iron Curtain that it is impossible to determine on any given occasion what we need to defend out country minimally. He also criticized the philosophy of "overkill" as a completely unrealistic evaluation of our country's defenses. In addition to this he outlined our present nuclear capability and emphasized the fact that attack on this country would mean certain destruction of the aggressor.

General Power also had the distinction of testifying against the politically popular Nuclear Test

Ban Treaty as a military authority. He warned the country in his testimony during a closed door session of the Congressional Committee that the world is not ready for disarmament in any form, however limited. To General Power, there is no better way of safeguarding the peace and guaranteeing the sovereignty of the United States than to develop bigger and better weapons and exploit space for aggressor purposes. However, he expressed more confidence in these three factors for world peace than of the United Nations which he was skeptical of:

- (1) System of checks and balances by which each branch of our government has power over each other.
- (2) Freedom of the Press
- (3) Civilian control of the military

After describing his 1956 trip

Straumanis Attends E.S. Meeting in N.Y.

A University of Missouri at Rolla research professor has just returned from a meeting of the Electrochemical Society in Buffalo, N.Y. He presented the results of his research in a particular metal corrosion problem at the meeting.

Dr. Martin E. Straumanis, professor of metallurgical engineering and research professor of materials of the University's Graduate Center for Materials Research, delivered his paper on Oct. 13 to the corrosion division members of the Society.

The problem, "The Divalency of Tin Ions Formed during Anodic Dissolution and the Behavior of the Tin Anode," delved into an advanced chemistry question concerning changes in tin when subjected to the action of acids. Dr. Straumanis' study, completed with the help of M. Dutta, West Bengal, India, proved that tin goes into solution only as a divalent ion. Previously in such cases, the monovalent characteristics of tin was erroneously assumed.

The Electrochemical Society membership includes professionals with academic degrees and interests in areas of electronics semi-conductors, batteries, electro-deposition, theoretical electrochemistry, corrosion and electrothermics, and metallurgy.

to the Soviet Union, the functions and organization of the Strategic Air Command, and speaking briefly on his book "Design for Survival." General Power held a ten-minute question and answer period from the audience. Although attendance was held down due to bad weather, it is felt that men of General Power's caliber are invaluable in presenting their views to the up-to-date student body.

The next lecture in the 1965-66 Student Union Lecture Series will be John Swanay, a folk singer which will be held in the Union Ballroom, Thursday evening, December 2.

When you can't afford to be dull, sharpen your wits with NoDoz™

NoDoz Keep Alert Tablets fight off the hazy, lazy feelings of mental sluggishness. NoDoz helps restore your natural mental vitality... helps quicken physical reactions. You become more naturally alert to people and conditions around you. Yet NoDoz is as safe as coffee. Anytime... when you can't afford to be dull, sharpen your wits with NoDoz.

Parks anywhere

A Honda needs a mere 3'x6' space to be perfectly content. And that puts a spot, about a mile away from

its destination.

There are other sides to Honda, too. Hondas are fiendishly frugal. A gallon of gas will carry you up to 200 mpg, depending on which of the 15 Honda models you're driving. And insurance bills shrink to practically nothing. As for upkeep, a Honda needs little.

The shining example above is the remarkable Honda 50. It sells for about \$215*. And there are 14 more models to choose from. Look them over.

See the Honda representative on your campus or write: American Honda Motor Co., Inc., Department C2, 100 West Alondra Boulevard, Gardena, California 90247.

Miner Editorials and Letters

On the Other Side of The Transit

BY DON WARD

Who's Afraid of Virginia Woolf? I am, I am.

Two years ago a play by Edward Albee called *Who's Afraid of Virginia Woolf?* opened on Broadway and became almost overnight the keynote to today's modern theatre. It was a protest against society and man and it superb. It won the best play of the year award and some half dozen other awards.

But now the motion picture industry has gotten their hands on the script and intend to present to the masses. This is more than a fine idea...except for the way they intend to do this. Their approach reminds me of a cartoon I once saw which advertised a new casting of Hamlet with Bob Dylan playing Hamlet, Lady Bird as Ophelia and Thunder Thornton as Polonius. This may seem a bit far fetched, but so is the cast the motion pictures propose. Richard Burton is to play George — a domineered and sharp tongued male. Only because of Burton's great acting ability do I see this as a possibility, although they're many better choices for the part. But Martha (his wife) is to be played by Liz herself — an actress who can not act her way out of anything. The part demands the strongest of women and Miss Taylor is certainly not that. The part of Honey (a no-brains, giggly child of a woman) is played by Sandy Dennis. Here is a waste of great talent. Her Broadway performance in *Any Wednesday* was superb. So to this white elephant cast, we must add a director and who would fit in better for this serious and powerful drama than Mike Nichols. Mr. Nichols has made his success in comedy and his only directing laurels have been two Broadway comedies (*Barefoot in the Park* and *The Odd Couple*).

What this all goes to show is that the motion picture industry is up to its usual tricks. As long as you present a name show and name actors, it does not matter a tiddle what the results are. Well, believe me, this one should really be a winner and if you were to ask me 'Who's Afraid of Virginia Woolf?' I would have to say "I am, I am."

From Other Campuses

College students are complaining that stiff academic loads are turning them into robots, reports Prof. Frank Krutzke of Colorado College who spent the past year examining freshman English programs on leading campuses throughout the country. It was the result of a study financed through a grant from the Danforth Foundation.

In a report delivered at the annual faculty fall conference, Professor Krutzke pointed to the "dangers of excellence." He said "Students seem to think they are overworked — especially at the best colleges. I am beginning to agree with the students. Some of the course assignments seem too hard. The professors want a lot these days and they want it done thoroughly."

Professor Krutzke felt that if courses are to be required during the freshman year they must be especially imaginative and well planned. "I did not find this was the case," he said. "Many of the required freshman courses were dull. One of the problems is lack of knowledge by college teachers about what the students have been exposed to in high school. There is no easy solution, but most of the colleges are working on the problem."

MINER

UNIVERSITY OF MISSOURI AT ROLLA

THE MISSOURI MINER is the official publication of the students of the University of Missouri at Rolla. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.25 per semester. This Missouri Miner features activities of the Students and Faculty of U. M. R.

There comes a time in every man's life when he must sit down and make a very thorough appraisal of himself and his way of living. Each and everyone of us, I am sure, at one time or another has done this in a small way. A simple look back at the preceding week and realizing that one has accomplished nothing will usually bring about a rapid change in one's behavior.

For example, how many of us really can look back and truthfully say that we have been putting in the required hours preparing for our classes? How many of us can truthfully say that we have been putting out our fullest efforts in an attempt to get out of an education all that we are supposed to put in?

I would say that now is as good a time as any to weed out any distracting elements in our study habits; to re-evaluate our way of living and see just what is receiving the most attention, studies or play.

There is only one sure way to get back on the right track, and that is through the use of concentration. It will do us no good to sit down to study if all we can think about is our last date at Stephens or our run-down car that is just begging for attention. We must learn to dismiss all of these things from our mind in an attempt to place all of our concentrated effort to the job at hand... studying.

This is not an easy thing to learn and it is certainly a harder idea to put into practice. However, once the basic techniques have been learned, they will be of greater use even in later life... if not for study, possibly for an assigned project in one's professional field.

Concerning Cheerleaders...

Dear Sir:

After reading Mr. Stieffman's letter to the Editor in last week's Miner, I couldn't help but write one of my own. It seems Mr. Stieffman did not approve of the cheerleaders wearing letters borrowed from the "M" club. If he would have looked closer he would have found that their sweaters were also "borrowed" — from last year's male cheerleaders.

The reason for all this borrowing is very simple. Uniforms purchased from a manufacturer require 3 or 4 weeks for delivery. Since the cheerleaders were not chosen until the Wednesday before Homecoming and it was desired to have cheerleaders in uniform at the homecoming game, the only solution was to use the sweaters and letters which were already available. The skirts they wore were made by the cheerleaders themselves between Wednesday night and the Saturday of Homecoming. Sweaters and letters have since been ordered and should be here in several weeks.

It might interest Mr. Stieffman to know that the cheerleaders are sponsored by the school. Both the "M" club and the Student Council are behind them one hundred per cent. All materials for the uniforms and payment for their construction were paid for by the Student Council. The "M" club donated the letters as well as several of its members' time in organizing the cheerleaders and taking care of other details.

In my opinion the cheerleaders have done an excellent job and they do deserve the continued support of the entire school. The students also deserve thanks for the cooperation they have shown thus far in supporting both our cheerleaders and our team.

Sincerely,
Michael Hardy

"It Could Be You"

On an engineering campus such as ours, perhaps too little attention is paid to current happenings. Of particular importance to the Miners are the recent Anti-Vietnam demonstrations and the attempt to discredit the efforts of our brave men in Vietnam.

I feel that we owe something to our soldiers, for after all; there are 4000 men, brave men, in Vietnam taking our place. They are fighting, and dying, for us in order to preserve freedom around the world and here in the United States. Why not give them some support? Show them that we back them 100% by participating in *Vietnam Mail Call*.

With the co-operation of General William Westmoreland, commander of United States troops in South Vietnam, *Vietnam Mail Call* is forwarding friendly letters of support and encouragement to our men in Vietnam. Mail your letters to U. S. troops in Vietnam through *Vietnam Mail Call*, P. O. Box 3104, Columbus, Georgia 31903. Use 8 cent air mail postage. Write a letter today and show our men we care.

Sincerely,
Neil Smith

EATON PAPER CORPORATION, PITTSFIELD, MASSACHUSETTS

Beta Sigma Psi Achievements Mark Way for New House Plans

The National Fraternity of Beta Sigma Psi is a distinctive fraternity in one all-important respect. It is a fraternity of Lutheran men founded on the bedrock of true Christian faith. This fact is responsible for its uniqueness and purpose of program.

Beta Sigma Psi was organized nationally on April 17, 1925, at the University of Illinois and now has ten active chapters and thirteen alumni chapters. Eta Chapter became an active chapter at MSM on April 5, 1952. In thirteen years the chapter has grown from eighteen charter members to the present figure of almost sixty actives and pledges. Also, the alumni roster is bulging with over 125 names.

Beta Sig is extremely active here on campus. Our emphasis on intramural sports has been stepped up in the last few years and we are now reaping the benefits with winning teams. Last year we retired the IFC Homecoming display trophy, having won it in 1961, 1963 and 1964. This year at Homecoming our pledges literally ran off with the State Street pajama race trophy.

Several Beta Sigs hold prominent positions on campus. Al Behring, our chapter president is

also president of the IFC, pledge trainer for Theta Tau, a member of Blue Key and Pi Tau Sigma; and past president and secretary of ASME. Jim Rosenkoetter is recorder for Intercollegiate Knights. Carl Rowold, Jerry Fehlig and Lonnie Hellwege are also members of Intercollegiate Knights. Gary Hoffstetter is a member of Eta Kappa Nu. Rich Bergsieker is a member of Phi Eta Sigma and Intercollegiate Knights. Al Panhorst is current president of ASME. Dave Weinrich is a member of Theta Tau and Karl Ziegler and Don Hartman are currently pledging. Frank Ollinger and Karl Ziegler are members of the Gamma Delta executive board. Prof. C.J. Grimm of the Electrical Engineering department is a special honorary member of Beta Sigma Psi and Prof. Paul Munger of the Civil Engineering department is our faculty advisor.

Most important, however, is the fact that Beta Sig is the top fraternity on campus scholastically. In the fall semester of 1964 the house grade point was 2.43. This was good enough to win the IFC scholarship improvement trophy. Last semester we placed fourth with a 2.49. Therefore, for the 1964-65 school year Beta Sig was the number one fraternity in scholarship on

campus. We are naturally proud of this achievement.

The future most certainly looks bright for Beta Sig. With 25 pledges this semester a new house is well on the way to being a reality. The plans are for a 70-man capacity house, approaching a cost of \$250,000. This is an important reason why we feel that Eta Chapter of Beta Sigma Psi is getting bigger and better every year.

Captain Dale Promoted

Capt Ronald E. Dale, Assistant Professor of Military Science, MSM, received Department of the Army promotion to the grade of Major on October 20th, 1965. The ceremony was held in the office of Colonel David L. Gundling, Professor of Military Science.

Major Dale came to MSM last August from assignment with the United States Military Assistance Advisory Group to Iran. He graduated from Michigan State University in 1954 and was com-

missioned a second lieutenant through ROTC upon graduation.

Major Dale, his wife, Shirlee, and daughters, Shawn, age 8, and Marcetta, age 2, reside at 8 Vi-burnum, Rolla.

★ STUDENT COUNCIL MINUTES ★

Remington Presents Proposed Rule Changes to Student Council

The regular meeting of the MSM Student Council was called to order by President Al Ponnwitz at 7:00 p.m. on Tuesday, October 26. Roll was taken and the minutes of the previous meeting were approved as written.

Treasurer Mike Hardy reported that there is a balance of \$4600 in the Student Council fund.

The following committee reports were then given:

Public Occasions Committee. Charles Rowland, chairman, asked that those members who were scheduled to assist in Parents' Day activities stay after the conclusion of the regular Student Council meeting for instructions on their various duties.

Rings Committee. Bernie Schweigert reported that new designs for class rings were still being shown to different fraternities and independents about campus.

Award Plaque Committee. Chairman Bill Wolf called a meeting of his committee for the purpose of updating the award plaques.

Off Campus Sign Committee. Maurice Murphy reported the following possible locations for new MSM signs:

1. Intersection of Highway 63 and Pine Street.
2. Intersection Highway 63 and State Street.
3. Pine Street across from Civil Engineering Building.
4. Rolla turnoff of Highway 66.
5. Highway 63 near Carney Manor.

The committee was instructed to investigate the matter further and report at the next meeting.

Professor Charles Remington then spoke to the Council on the behalf of the faculty committee on scholarship concerning the following rules suggested by his committee:

- 1) No transfer student from a junior college or other college who is on probation is allowed to enter a department on the MSM campus without the consent of that department.
- 2) The following are new credit requirements for a B.S. degree from MSM. 143 total credit hours are required in the school of engineering and in the school of mines and metallurgy, while 136 total credit hours are required in the school of science.
- 3) The normal schedule shall consist of not more than 19 hours per semester in the school of engineering and the school of mines and metallurgy, and 18 hours in the school of science.
- 4) A student with a 2.75 grade point or better may include 3 additional hours in his normal schedule.

FACULTY-STUDENT RELATIONS (Continued From Page 1)

Science Fair: R. L. Tritschler.

Student Counseling: L. Burkemper, T. Gaylord, D. Liescheidt.

Student Leadership: A. Behring, J. Chase, W. Guelbert, B. Graham, M. Hardy, J. Henry, M. Thieme, B. Wolf.

Traffic Safety: A. Ponnwitz, B. Graham, M. Hardy, J. Henry.

University Calendar: J. Mead, M. Walker, M. Thieme, B. Wolf.

Who's Who: A. Conigliaro, A. Ponnwitz.

Ad Hoc Committee-Instruction: A. Ponnwitz.

5) The normal schedule may be increased by the number of hours required for military science.

6) No student, transfer or otherwise, shall be allowed to enroll in a course in a given department unless he has achieved a C or better in all courses prerequisite to the courses he wishes to take.

Professor Remington also pre-

sented the following rule changes for the consideration of the Council:

a) If a student officially drops a course after six weeks, a grade of F shall be recorded unless extenuating circumstances are stated by the department.

b) If a student receives an F, the F shall remain in the figuring of the cumulative and semester

grade point until removed.

c) Instructors are to report absences to the Director of Student Personnel.

Because of the lack of time, Professor Remington briefly stated other rule changes and it was decided by the Council to meet again at 7:00 p.m. on Tuesday, November 2, to discuss these changes more thoroughly.

Under new business it was moved and seconded that \$200 be spent for various equipment for the MSM cheerleaders. The motion carried. Proposed changes in the constitution and by-laws of the St. Pat's Board were also read. It was moved and seconded that these changes be tabled until the next regular meeting. The motion carried.

The IBM interviewer will be on campus November 3-4

Interview him. How else are you going to find out about new ways to use your talents and skills in an exciting "go-places" career?

You could visit a nearby IBM branch office. You could write to the Manager of College Relations, IBM Corporate Headquarters, Armonk, New York 10504. But we would like to see you on campus. Why not check at your placement office today? See if you can still make an appointment for an on-campus visit with IBM. Then interview the IBM interviewer. *Whatever your area of study*, ask him how you might use your particular talents at IBM. Ask about your growth potential in America's fastest-growing major industry. You'll never regret it. IBM is an Equal Opportunity Employer.

Capacity Parents Day Crowd to See Miners Battle Springfield

Parents and students alike will be looking for victory at Jackling Field tomorrow, and Coach Dewey Allgood's fighting Missouri Miners will be out to snare their first conference win in three MIAA starts as they meet the Springfield Bears. A capacity Parents' Day crowd will be on hand for the Miners' seventh game of the fall schedule; a schedule which so far has left a mark of two wins and four losses.

The Bears from Southwest Missouri State have several things going for them, including two league wins, five victories in six starts, and All-Conference star Cornelius Perry. Perry is second only to Kirksville's Washington in the MIAA scoring totals and is one of the best runners in the league. The senior halfback from East St. Louis, Illinois, has been held back in the past few games, mainly due to opposing defenses which are keyed to him.

Last Saturday, the Bears romped to a 35-14 triumph over the Mules from Central Missouri

State (slated to host MSM on November 6). SMS combined its usual running game with one of the better Bear passing performances of the season to roll up three touchdowns in the second period.

Quite instrumental in the win was quarterback Dan Young, a senior from Nevada, Missouri. Scoring two of those TD's totaling 63-yards rushing, and connecting on 7 of 9 passes were a few of this gridders' feats, and he is expected to make a similar showing in tomorrow's game.

Fullback Pat Hogan also picked up a pair of touch downs and kicked five of five extra points. Hogan is presently the conference's leading punter (29

times for a 45.5 average) and is third leading scorer for the six teams.

Springfield's offensive and defensive units rank among the top in the MIAA, and the Miner defense will have to improve quite a bit from last week's encounter with Maryville. MSM lineups will remain the same with Ron (Continued on Page 8)

DAMOTTE PLACES SECOND

Varsity Harriers Win Over Westminster 23-35

The MSM Harriers came through with their first victory of the season last Tuesday, when the Cross country squad of Westminster College at Fulton fell by the score of 23-35.

The three and a half mile course was covered first by Gary Schmidt of Westminster in a time of 17:41. Miners took second, third, and fourth places, with Skip Damotte leading the pack (18:03). Next were Ronnie Tracy (19:00) and Stan Nolestine.

Phil Sachs took fifth place for the Fulton group, and Tim Shanholtzer placed sixth for MSM.

A triangular meet was held at Central Missouri State at Warrensburg last Saturday, with MSM and Kansas State of Pittsburg participating along with the CMS Mules. As expected, Pittsburg walked off with the top honors, scoring 19 points and an amazing ten out of the first eleven places! Host Warrensburg was second with 55 points, and the Miners totaled 60.

Skip Damotte was second only to Pittsburg's Tom Wilkins, who ran the course in 21 minutes and 33 seconds. CMS placed men in the twelfth through sixteenth positions,

while Ron Tracy pulled seventeenth for MSM. Also scoring for the Miners were Larry Schiebel and Tim Stanholtzer.

The results of the meet are a good indication that MSM has a chance to overtake Warrensburg in the MIAA Conference Meet to be held November 6. Damotte is running very well now, according to student coach Ted Moore, and he also mentioned that Ron Tracy is showing marked improvement, with a big difference noted in the last two meets. Moore has high hopes that the improvements will continue and that a good showing will be made at the William Jewell Invitational to be staged tomorrow.

MIAA Report

By Phil Eatherton

The MIAA remained deadlocked last Saturday as Kirksville, Springfield, and Maryville ran up big scores in remaining undefeated in conference play, each with 2-0 records. While the Miners were losing to Maryville, the other two front-runners kept pace as Kirksville defeated Cape Girardeau 27-7 and Springfield rolled past Warrensburg 35-14.

At Cape Girardeau, the Bulldogs from Kirksville had too much for Cape, as they rolled by 27-7. Cape's only score came with five seconds left, after recovering a fumble on the Kirksville 5, a Gary Brume to Mike Kelly pass put their only score up.

Kirksville did all their scoring in the first three periods with Shanon Washington scoring two touchdowns including a 90-yard run in the second quarter.

Kirksville is 2-0 in the conference and 5-1 overall; Cape is 0-2 in the conference and 0-6 overall.

Springfield swept past Warrensburg 35-14 with a varied attack that included 7 of 9 pass completions for 138 yards by Don Young and two touchdowns each by Young and Pat Hogan.

Tied 7-7 in the second quarter Springfield recovered a fumbled punt on the two to score. Springfield scored twice to push ahead 28-7 at the half.

Springfield is 2-0 in the league and 5-1 overall while Warrensburg is 0-2 and 1-1-4.

MIAA STANDINGS

Team	W	L	Pct.

Mural Rifle Competition Begins This Week

Under the direction of the MSM Military Department, intramural rifle competition is now underway with completion scheduled in several weeks. Practice, which began in the latter part of September, has brought the participating campus organizations into top form for the sport.

Totalling 671 points, the Prospectors Club topped all teams entered in the shooting last year. R. T. Fisher, Norman Miller, and Martin Komo totaled 212, 227, and 232 points, respectively for the Prospectors, and the Kappa Alpha squad of Fischer, Mace, and Schmidt scored 651 for second place honors.

Competition is held at the University rifle range.

Papas and Albanese Lead NEMO Bulldogs to 40-12 MIAA Victory

By Lloyd Jay Lazarus

The Homecoming crowd at Northwest Missouri State at Maryville had a lot to cheer about as the Bearcats beat the Miners 40 to 12. The combination of Papas and Albanese gave the Miner secondary fits all afternoon. The game would have ended differently if the offense could have capitalized on the many opportunities offered to them.

The Bearcats drew first blood on the opening series of plays. They literally flew downfield on the arm of Leo Papas and the catching of Bob Albanese. Papas

scored on a quarterback sneak from the one yard line. He also kicked the extra point.

The Miners then controlled the ball for the first quarter and all the last five minutes of the second quarter. Ron Lewis did everything but catch the football for his receivers. Everyone of our eligible pass receivers managed to drop a pass inside the ten yard line or in the end zone. We were inside the Bearcat twenty yard line six times during the game.

Erxleben Scores From 7

We scored in the second period when Rich Erxleben took a screen pass from Ron Lewis on the seven yard line and scored. Verdi's PAT attempt was wide and the score was Bearcats 7 Miners 6.

Next came the dreadful five minutes when we couldn't do anything right and the Bearcats took advantage of every break. Albanese scored on a pass from Papas. Alvin caught another Papas pass for the second touchdown, following an interception of a Lewis pass. Papas' first extra point was good but his second was blocked. The score at half time was Bearcats 20, Miners 6.

Maryville opened the scoring in the third quarter when Papas threw to Peterson who then threw to Albanese who scored. This play was quite unique because two forward passes were thrown. According to MIAA rules this is illegal, too bad the officials never read the rule book. Papas' PAT was good. Later on in the quarter Papas attempted a field goal from the Miner thirty-four yard line but the attempt was wide.

Second Score by Lewis

Ron Lewis scored for the Miners when he scampered eighteen yards for a touchdown. Ron made one of the finest plays of the day for the Miners. All his receivers were covered and he just took off

for the promised land. The two point attempt failed and the score was 27 to 12.

In the fourth quarter the Bearcats scored twice. Letcher scooted around end for thirty-four yards and a touchdown. Papas' PAT was again good. The Bearcats scored the final touchdown with six seconds left in the game when John scored from the six yard line. The Bearcats' two point conversion was no good.

George Gasparovic set a new Miner record Saturday when he caught three passes and raised his career total to fifty-eight. The previous record was held by Tietgens and Cooper.

SIDELINES

BY JIM WEINEL

Now that the Miner Footballers have last week's spectacle out of their system, things are bound to be looking up tomorrow when the Southwest Missouri Bears visit Jackling Field. Tagged as the worst game of the year by Dewey Allgood, the Maryville contest found the MSM offensive unit playing a fair ballgame. "It was the defense that was really disappointing," said the Miner mentor, "except for the performance of Jim Key, who was outstanding in the right tackle position." Key is a 6-foot, 205-pound sophomore from Rolla. Getting back to the offense, this unit gained almost 260 yards on the ground, the highest total so far this year. Of course, with five dropped touchdowns passes to the team's credit, it's no wonder that the Silver and Gold went down to defeat.

Here's the answer to all those tired and sleepy mornings you spend in early classes; just make a few "early-bird" rounds with the varsity cross country squad every morning at 6 A.M.!! That's right, they're working out twice a day now, and the improvements are already being realized. With just two more weeks left in the fall schedule, Ted Moore's hopes are looking up. Chances are good for a victorious finish.

Senior halfback George Gasparovic is currently heading the list of yardage totals with 514, but Rich Erxleben continues to be the leading Miner rusher. Rich has a total of 362 net yards gained for 77 tries, an average of 4.7 per trip. Gasparovic is the top pass receiver, having caught 16 for a total of 218 yards.

Varsity Rifles Defeat Wichita in First Meet

The MSM Varsity Rifle Team defeated the Wichita State University shooters in a shoulder to shoulder match held at the MSM range on Saturday, October 23rd. The Miners won by a score of 1028 to 997. This was the first inter-collegiate rifle match of the year for the MSM team, and the win offsets a loss suffered last year by the team to the Wichita State Team.

High firer for the match was Paul Winkel of MSM, with 270 out of a possible 300. The second highest shooter for the match and MSM was Wilford Pomeroy, with 265. High shooter for Wichita State was Humphreys, with a score of 258.

Other shooters on the MSM Team were John Tenfelder, with 254, and Theodore Moore, with 249. The firers on the Wichita State Team and their respective scores were: Hicks, 253, Renicker, 246, and Fry, 240.

SFC William Merideth, Assistant MSM Rifle Team Coach, explained that the NRA international

type targets were being used for the matches for the first time this year, which accounted for the lower than normal scores being recorded for the MSM shooters. This target is the type that is used for Olympic team competition, the PAN AM games, and world competition.

SFC Merideth also stated that there are several promising new firers among the Freshmen shooters at MSM and that the prospects for the Team look real good for the next few years.

The Marksmanship Program at MSM is sponsored jointly by the Athletic Department, under the direction of Athletic Director Gale Bullman, and the Military Department, under the direction of Colonel David L. Gundling, Professor of Military Science. Lt. Col. John R. Short, Jr., is the Rifle Team Coach.

The MSM Team will travel to Terre Haute, Indiana, this coming weekend for a shoulder to shoulder match with Rose Polytechnic Institute.

MINERS BATTLE SMS

(Continued From Page 7)

Lewis in the quarterback position, and Erxleben, Price, Ricker, and Kucenas competing for backfield starts.

The season's final home game will be the finale of the nine-game card and will be played November 13 against the Indians of Cape Girardeau.

HARMON HIGHLIGHTS

In spite of the upsets, there wasn't the usual pushing, shoving, and jockeying for position among the top teams this week as only three teams found the Navy, and Florida State fell from the group, and Minnesota, Baylor, and Princeton rented the high priced real estate.

Michigan State and Arkansas will continue to steam toward undefeated seasons.

If anybody is going to make trouble for undefeated Nebraska, it will have to be Missouri this Saturday. The Tigers are ranked 16th, and are also undefeated in Big Eight competition.

(By the author of "Rally Round the Flag, Boys!", "Dobie Gillis," etc.)

TWELVE IS A MANY-SPLENDORED THING

Today I begin my twelfth year of writing this column in your campus newspaper.

These dozen years have passed like a dozen minutes. In fact, I would not believe so much time has gone by except that I have my wife nearby as a handy reference. When I started this column, she was a mere slip of a girl—supple as a willow bough and fair as the morn. Today she is gnarled, lumpy, and given to biting the postman. Still, I count myself lucky. Most of my friends who were married at the same time have wives who chase cars all day. I myself have never had this trouble, and I attribute my good fortune to the fact that I have never struck my wife with my hand. I have always used a folded newspaper, even during the prolonged newspaper strike of 1961 in New York. During this journal-less period I had the airmail edition of the *Manchester Guardian* flown in daily from England. I must admit, however, that it was not entirely satisfactory. The airmail edition of the *Guardian* is printed on paper so light and flimsy that it makes very little impression when one smacks one's wife. Mine, in fact, thought it was some kind of game and tore several pairs of my trousers.

But I digress. For twelve years, I say, I have been writing this column. That is a fact, and here is another: I shave every morning with Personna Stainless Steel Blades. I bring up Personna Stainless Steel Blades because this column is sponsored by the makers of Personna and they are inclined to brood if I omit to mention their products.

"... only fleeting enthusiasm among the coaches."

Not, let me hasten to state, that it is any chore for me to sing the praises of Personna—as you will agree once you try this sharpest, smoothest-shaving, longest-lasting blade ever devised by the makers of Personna Blades—now available both in Double Edge and Injector style. Personna, always the most rewarding of blades, today offers even an extra reward—a chance to grab yourself a fistful of \$100 bills from a \$100,000 bowl! The Personna Stainless Steel Sweepstakes is off and running, and you're all eligible to enter. Visit your friendly Personna dealer soon to pick up an entry blank (void where prohibited by law).

And, by the way, while you're at your friendly Personna dealers, why don't you ask for a can of Burma Shave? It comes in Regular or Menthol; it soaks rings around any other lather, and it's made by the makers of Personna.

But I digress. For twelve years, I say, this column has been discussing, forthrightly and fearlessly, such burning campus questions as "Should students be allowed to attend first-hour classes in pajamas?" and "Should deans be retired at age 25?" and "Should foreign exchange students be held for ransom?"

Today, continuing the tradition, we take up the thorniest academic problem of all: the high cost of tuition. Let me tell you how one student, Lintel Sigafos by name, solved this problem.

Lintel, while still a boy in Straitened Circumstances, Idaho, had his heart set on college, but, alas, he couldn't afford the tuition. He applied for a Regents Scholarship but, alas, his reading speed was not very rapid—only two words an hour—and before he finished even the first page of his exam, the Regents had closed their briefcases crossly and gone home. Lintel then applied for an athletic scholarship, but he had, alas, only a single athletic skill—balancing an ice cream cone on his chin—and this, alas, aroused only fleeting enthusiasm among the coaches.

And then he found the answer: he would get a student loan! Of course, he would have to pay it back after graduation, but clever Lintel solved that, too: he kept changing his major, never accumulating enough credits to graduate until he was 65 years old. Then he repaid the loan out of his Social Security.

Where there's a will, there's a way.
